Jeff Jones, Lydia Saad
April 7-11, 2011

Results are based on telephone interviews conducted April 7-11, 2011 with a random sample of 1,077 adults, aged 18+, living in all 50 U.S. states and the District of Columbia.

For results based on the total sample of national adults, one can say with 95% confidence that the margin of error is ± 4 percentage points.

For results based on the sample of 534 adults employed full- or part-time, the maximum margin of sampling error is ± 5 percentage points.

For results based on the sample of 656 stock owners, the maximum margin of sampling error is ± 5 percentage points.

For results based on the sample of 341 retirees, the maximum margin of sampling error is ± 7 percentage points.

For results based on the sample of 736 non-retirees, the maximum margin of sampling error is ± 4 percentage points.

For results based on the sample of 812 homeowners, the maximum margin of sampling error is ± 4 percentage points.

Interviews were conducted using random-digit dialing on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample includes a minimum quota of 400 cell phone respondents and 600 landline respondents, with additional minimum quotas among landline respondents for gender within region. Landline numbers are chosen at random among listed telephone numbers, cell phone numbers are selected using random-digit dial methods. Landline res-9(m)26()JTB1 0 0 1 72.024 294-(S

17. *(Asked of non-retired adults)* When you retire, do you think you will have enough money to live comfortably, or not?
