JUNE WAVE 2

-- FINAL TOPLINE --

Timberline: 937008
H: 639
Princeton Job #: 13-06-009

Jeff Jones, Lydia Saad
June 20-24, 2013

Results are based on telephone interviews conducted June 20-24, 2013 with a random sample of 2,048 adults, aged 18+, living in all 50 U.S. states and the District of Columbia. For results based on these samples of national adults, one can say with 95% confidence that the margin of error is ± 3 percentage points.

For results based on the samples of 1,039 national adults in Form A and 1,009 national adults in Form B, the margin of sampling error is ± 4 percentage points.

For results based on the sample of 234 adults who do not have health insurance, the margin of sampling error is ± 8 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 50% cell phone respondents and 50% landline respondents, with additional minimum quotas by region. Landline and cell phone telephone numbers are selected using random digit dial methods. Landline respondents are chosen at random within each household on the basis of which member had the most recent birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two samplin(e)10(c)60(sA1 0 0 1CID 20BDC BT1 0 0 1 72.)9(s)16pling
